SAVE THE DATE: Dr. Ginsberg Day: Friday, May 6, 2022

May 6, 2022, is a very special day for Princeton Public Schools: we will be celebrating Dr. Robert Ginsberg's, PPS former assistant superintendent, lifelong dedication to the

students in our public schools. Mark your calendars and join us! Bob (or Dr. G as most of our kids know him) has been in the Princeton Public School District for over 30 years and he helped shape the minds and character of countless PPS students, young and old.

It will be a day of great celebration with food trucks, performances by the Princeton High School band, and so much more. May 6th is also Bob's birthday so expect cake and lots of fun. Join us in honoring Dr. Ginsberg by either purchasing a commemorative brick that will be displayed on the new "JP Walk of Fame" lane or buying a tributary ad in a memory book that will be gifted to Bob on that day.

The deadline for brick purchases is April 22nd and for the tributary ads, the deadline is April 7th. On this special day, the Johnson Park amphitheater will be officially named the Robert A. Ginsberg Theater. Don't miss out on the fun.

More details about this event and how you can purchase a brick or a tributary ad can be found here:

PHS Health and Wellness Green Team News

Welcome to news and tips from the PHS Health and Wellness Green Team (HWGT). Each week we will provide updates and information to help PHS families lead more mindful and sustainable lives.

This Week's Sustainability Tip: Electric Vehicles 101

In 2020, Governor Murphy signed landmark legislation to boost the use of plug-in electric vehicles (EVs) in New Jersey. Some of the key components of the law included:

- The creation of a rebate program for EV purchases.
- The setting of aggressive goals for NJ's network of public charging stations to include 400 public fast charging stations at 200 locations along major highways and throughout NJ's communities by 2025.
- The setting of aggressive goals for EV sales to include the registration of 330,000 EVs in NJ by 2025, increasing to 2 million EVs by 2035.

Switching to an EV is easier and more affordable than ever. Sustainable Princeton offers the following advice to buyers considering the purchase of an EV.

- Plug In America or Destination Electric can help you search and compare the more than 40 options currently available.
- Visit the U.S. Department of Energy's calculator tool, fueleconomy.gov, to compare the environmental and cost impact of owning an EV.
- Using apps such as PlugShare and A Better Routeplanner can help you find an EV charging station. Princeton has 6 public charging stations: 2 at the Princeton Shopping Center, 2 at Spring Street Garage, and 2 at Palmer Square Garage.
- Funding is available to offset the cost of purchasing and installing EV charging stations for multi-unit dwellings, businesses, governments, non-profits, and educational institutions.
- Visit ChargeHub for a guide to compare the most popular charging stations on the market.
- Visit Energy.Gov's website to get the most up-to-date information about federal and state tax credits and other incentives.
- Replace a gas-powered car with an EV and lower your maintenance costs. The average cost to operate an EV is \$485 per year compared to \$1,117 per year for a gas-powered vehicle.
- Zero emission vehicles are exempt from New Jersey state sales tax.
- Switching to an EV will reduce greenhouse gas emissions even when the emissions from electricity generation sources in our area are taken into account.
